

JEAPIE.COM - GRAVITEC.NET SWITCHOVER GUIDE

Dear customer!

Thank you for using service Jeapie.com!

We pleasure to inform you: 30.06.2016 we had moved all the accounts from <https://Jeapie.com> to the new platform, <https://Gravitec.net>.

The new platform provides improved interface and new featured.

Switchover for Jeapie.com customers

1. On 07.07.2016 all the customers obtained an access to their new accounts at <https://gravitec.net>
2. Login to gravitec.net service will be carried with your valid login/password for jeapie.com service.
3. All accounts data was moved to the new accounts on gravitec.net
4. You need to upgrade the integration code and SDK files to utilize new platform features.

Switchover for HTTP-based websites:

STEP 1: Remove Jeapie's integration code from your website.

STEP 2. Open "Site Settings" page in Gravitec.net dashboard (cog icon next to a site name).

STEP 3. Add the integration code.

Copy and paste line of code into your website template before the closing tag `</head>`

Switchover for HTTPS-based websites:

STEP 1: Remove Jeapie's integration code from your website.

STEP 2. Delete Jeapie's SDK files (manifest.json, push-worker.js) from the root folder of your website.

STEP 3. Open "Site Settings" page in Gravitec.net dashboard (cog icon next to a site name).

STEP 5. Add the integration code.

Copy and paste line of code into your website template before the closing tag `</head>`

STEP 6. Download archived SDK files ("Download" button)

STEP 7. Extract SDK files (manifest.json and push-worker.js) and add them to the root folder of your website.

If you use the API: Replace all of the words "Jeapie" to words "Gravitec" in the API-related source code.
